HOW INTELLIGENT IS YOUR
IN-STORE INVENTORY?

Modern retail demands more than visibility.
It demands foresight.

Welcome to **Hyper-Intelligent Inventory Management** with gStore – where your inventory doesn't just sit on shelves; it thinks, acts and responds in real time.

What Is Intelligent Inventory?
Inventory that...

Knows **when** it needs to be replenished

Knows **where** it is in real time

Knows **what** quantities are needed on the floor

Knows **why** an item sells better in a specific spot

What is gStore?

gStore is a **retail SaaS application** that makes inventory intelligent. It elevates in-store execution using **AI-driven analytics, RFID** and real-time updates to deliver item-level accuracy, automated tasking and GPS-like location precision.

What gStore Enables

- **Real-Time Inventory Visibility** – Reduce search time, labor costs and stockouts
- **GPS-Like Location Precision** – Know where every item is at any point in time
- **AI-Powered Tasking** – Optimize and automate receiving, replenishment and associate workflows
- **Unified Retail Execution** – Inventory + Ops + CX, all in one platform

Why gStore?
